2026–now

Independent software development

CURRENT

Building independent and open-source software projects; open to freelance opportunities. Comfortable working independently or as part of a team.

oct 23 – oct 31

replit_ui

OPEN-SOURCE PROJECT · FLUTTER

Designed and built replit_ui end to end: reusable Flutter chat components, a streaming SDK for Gemini, OpenAI-compatible, and Anthropic APIs, plus its documentation website and interactive playground.

Website Playground pub.dev Source code

aug 21 – oct 23

OpenKey

OPEN-SOURCE PROJECT · PASSWORD MANAGER

Built OpenKey's CLI, browser extension, documentation, and server components. Implemented Nearby for direct, encrypted vault sharing between devices on the local network without a central server.
